### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4,6,7,9-14,16-22,25-28,30,31,35-44 are rejected under 35 U.S.C. 102(b) as being anticipated by Jaeger et al (US Patent No. 5394846). Jaeger et al teaches an air intake assembly for an engine having a throttle body (1), a first inlet (the main bores of the throttle body), a second inlet (43), an outlet (the bores downstream of the throttle plate, and a throttle plate (7a,7b). Note in Fig. 5, that the idle air bypass tube (43) has a wider opening that narrows, somewhat funnel shaped as in applicant's Fig. 14. See col. 4, lines 33-61.

3. Claims 1-4,6,10-20,26,29-31 and 35-43 are rejected under 35 U.S.C. 102(e) as being anticipated by Sharpton (US Patent No. 6647956). Sharpton (see Fig. 6) teaches an air intake assembly for an engine having a throttle body (10), a first inlet (21), a second inlet (31), an outlet (22), and a throttle plate (12).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 5,8,23,24,45 and 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jaeger et al. Jaeger et al applies as above, but does not teach the particular details claimed regarding a shoulder, a rib and a groove on the bypass tube. Applicant is hereby placed on official notice that each of these claimed features is known in the art of tube connections and it would have been obvious to one of ordinary skill in the art to have used a tube having such features since they would have aided in sealing the passage connection to the tube and the shoulder would have been helpful in providing a stop indicative of how far into the passage to insert the bypass tube.

Art Unit: 3747

7. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sharpton .

Sharpton applies as above, but does not teach the particular details claimed regarding a rib on the bypass tube. Applicant is hereby place on official notice that this claimed features is known in the art of tube connections and it would have been obvious to one of ordinary skill in the art to have used a tube having such a feature since it would have aided in sealing the passage connection to the tube.

***Allowable Subject Matter***

8. Claims 32-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
